please do not report the images to the
Image Problem Mailbox.**

1. A method for presenting a wagering interface for interactive wagering comprising:

- presenting a display of odds for a race, wherein the display shows odds for less than all of the runners in the race at any point in time; and
- rotating over time the odds shown in the display so that all of the runners in the race are displayed over a window of time.

2. A method for interactive wagering, comprising:

- receiving a selection of a multi-race wager from a user;
- displaying horse selections for multiple races based on the multi-race wager; and
- receiving selections of horses for the multi-race wager in an order selected by the user.

3. A method for interactive wagering, comprising:

- receiving from a user selections of multiple players in an interactive wagering system;
- enabling the user to toggle an authorization status of each player such that each player is authorized or unauthorized;
- enabling the user to toggle each player on or off if the player is authorized; and
- preventing a player from subsequently appearing in a list of potential players if that player is unauthorized or off.

automatically placing the default wager
on behalf of the user.

5. The method of claim 4, further comprising receiving a selection of a track to be a default setting of the default wager.

6. The method of claim 4, further comprising receiving a selection of a bet type to be a default setting of the default wager.

7. The method of claim 4, further comprising receiving a selection of a bet amount to be a default setting of the default wager.

8. The method of claim 4, further comprising receiving a selection of a previously selected track to be a default setting of the default wager.

9. The method of claim 4, further comprising receiving a selection of a previously selected bet type to be a default setting of the default wager.

10. The method of claim 4, further comprising receiving a selection of a previously

selected bet amount to be a default setting of the default wager.

11. A system for presenting a wagering interface for interactive wagering comprising:

control circuitry that presents a display of odds for a race, wherein the display shows odds for less than all of the runners in the race at any point in time, and rotates over time the odds shown in the display so that all of the runners in the race are displayed over a window of time.

12. A system for interactive wagering, comprising:

a user input device that accepts user inputs; and

control circuitry that receives a selection of a multi-race wager as one of the user inputs, that displays horse selections for multiple races based on the multi-race wager, and that receives selections of horses for the multi-race wager in any order desired by the user.

13. A system for interactive wagering, comprising:

a user input device that accepts user inputs; and

control circuitry that receives selections of multiple players in an interactive wagering system as some of the user inputs, that enables the user to toggle an authorization status of each player such that each player is authorized or
